battlerite royale - legendary adventure pack

Weapons aren't included. Beware. The skins are really ugly, but the mount is nice :P. I've always loved Battlerite, played arena way back in early access and put in over 200 hours. Got the Ultimate Fan Pack back then same as I got this because I believe these developers make amazing games that deserve to be played and supported. Hopefully Battlerite Royale blows up! Oh yeah and the skins are nice too haha.. I bought this to support the game... but I thought they would add new royale skins to the game for free\unlock after this pack. Now that they are out of ea and have released adventure pack 2 I am a bit upset, as I have every royale weapon, but no skins to try and unlock specifically for royale in game.. I would never spend 44,98\u20ac on skins DLC ;PPppPPpp

i don't care that i did spend alot of money on this game! I supporting them.  
The skins are really sick :) enjoy

Jumong's face is so unpolished and ugly.... I bought this DLC, and you dont recieve the weapons that are clearly showcased as apart of the legendary outfits you purchase. 32\u20ac for half finished sets, very dissapointing.. Mount is so cute :p. Freya is a little ugly and I don't use. But Jumong, Raigon, Bakko, and Ashka are all gorgeous. Support the game and look great doing it!
