The English language version of the game, later titled Parasite Eve II: Death's Egg, was published in the US in October 1997. Parasite Eve II is the second installment in the Parasite Eve series. The game revolves around the character, Eve, as she attempts to rescue her girlfriend, Mia, from the clutches of a mysterious villain called the Black Spider. The game was re-released in the

UK in 2018. Gameplay is similar to that of the original Parasite Eve, albeit with some differences. The story is similar as well, but instead of Mia, it focuses on Eve and her partner, Aveline, attempting to rescue Aveline's girlfriend, Sophia,

from the Black Spider. There are many differences in gameplay between this game and the original, but the majority of them revolve around this new character, Eve. The original game featured a static protagonist, Eve, which had to collect items and examine them before she could proceed. The new game features more traditional role-playing game gameplay, similar to that of the Final Fantasy games. In addition to the basic role-playing elements, Parasite Eve II introduces a number of new gameplay features. In the original game, there were six playable characters: two from the original Parasite Eve (Mia and Eva), and four from the sequel, Blood Will Tell. In this game, there are eight playable characters. The final two are new: Eve and Aveline. New features of the gameplay include: Ability to move freely throughout the world. Eve is free to roam around the island, as well as teleport to areas of interest. As a consequence, Eve will be able to see the events occurring in most areas of the game without the need to constantly fight enemies. Status effects. Status effects are a new feature. Each character has a certain number of stat points, and upon taking certain actions, the character will have a status effect. These status effects will affect the player's health, attack power, rate of recovery and other aspects of the gameplay. Combat system. While in battle, the game will be fought using a combat system based on the concept of a card deck. The player will have a hand of two action cards and four money cards. The player must perform actions from the cards in order to perform a special attack. The final card of the hand determines the special attack, which will affect both the enemies and the player.
